

Company Name: **Digger Data LLP**

Job Role: **Data Research Specialist**

Job Requirements:

- Excellent proficiency in English reading and speaking.
- Must be adept at understanding American English accents.
- Excellent ability in collecting, analyzing and interpreting data.
- Basic computer skills.
- Bachelor's degree in any subject.
- Candidates with prior experience in research and analysis will be given more preference.

Job Description:

- As a part of the Data Research Analyst Team, your daily responsibilities are to diligently go through attorney data and carefully take a note of it.
- You will be attending meetings every week where you will be detailed about the new arenas that you will be needing to research and code about each attorney to make the data more distinct and functional.
- Our clients are New York based, so you will be researching attorneys who are associated with the bars of the USA.
- You need to be inquisitive, organized and logical to excel in the Data Research Analyst field.
- The office hours might require you to work in the evenings and continue post midnight.
